DETAILED ACTION

This Application has been examined. The claims 1-10, 12-22 are pending. The examination results are as following.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a pointing device electrically connected to a computer for controlling movements of cursor on a display device of the computer, the pointing device comprising a housing; a pointing unit installed inside the housing for generating pointing signals to control movements of the cursor; a rollable device adapted to control scrolling of a window shown on the display device when rotated by a user. The combination of the closest prior art of Levi Montalcini (US6,865,718), Faltermeier et al. (US 5,712,725) and Lo (US 5,699,083) disclose a similar system, however, they fail to teach a light source for illuminating the rollable device; and a control unit for controlling the pointing device, when the computer transmit a state signal to the pointing device, the control unit controls the light source to determine an illumination mode of the rollable device according to the state signal as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
